Measure Set: Web-based Measures

Measure ID#: OP-26

Outpatient Setting: Hospital Outpatient Department Surgery

Performance Measure Name: Hospital Outpatient Department Volume for Selected Outpatient Surgical Procedures

Description: The aggregate count of selected outpatient procedures performed within the outpatient department (e.g., outpatient surgery, cath lab, endoscopy). This excludes procedures performed within the emergency department (ED). Most hospital outpatient procedures (99 percent) fall into one of nine categories: Cardiovascular, Eye, Gastrointestinal, Genitourinary, Musculoskeletal, Nervous System, Skin, Respiratory and Other. The nine categories and corresponding Healthcare Common Procedure Coding System (HCPCS) are listed in the table below.

Measure ascertains response to the following question(s):

- What was the aggregate count of selected outpatient surgical procedures per category?

Annual data submission period: See the timeline posted to QualityNet.org for this measure; select Hospitals-Outpatient and then Data Submission in the drop-down menu.

Data entry will be achieved through the secure side of QualityNet.org via an online tool available to authorized users.
